

Sustainability Policy

i-Design Furniture Limited is aware of the environmental, social and economic interests of all stakeholders, balancing them together to create a platform for the company's sustainable activities. The sustainability principles of i-Design Furniture Limited are testament to its attitude towards its customers, employees, co-operation partners, shareholders and society: to work, to earn and to use natural resources responsibly.

i-Design's principles of sustainability

- ✓ To take care of the environment using environmentally friendly management principles.
- ✓ To stimulate sustainable and efficient use of natural resources
- ✓ To ensure that the production of products and all its offered services are human and environmentally safe.
- ✓ To provide a safe and encouraging working environment and fair and motivating remuneration to all its employees.
- ✓ To develop human potential and respect everyone's abilities and provide appropriate training.
- ✓ To respect our society's viewpoint and promote a mutual understanding through continuous dialogue with our customers.
- ✓ To implement competitive business activities and increase our market share
- ✓ To create a balanced return on capital and adequate profit

i-Design's sustainability policy tries to clearly support the fulfilment of its mission – to enable customers, suppliers and all its partners and employees of the company to develop a long term partnership.
